Release Notes

FY23Q1S3

Build number: 2313.1

Bug Fixes

Title

CLS-13431

Problem

Our new trigger UER on user import from Spreadsheet implementation failed to correctly account for completed enrolments when triggering enrolment rules for updated users, as this functionality was originally designed to only trigger for new users.

Fix

User Enrolment Rules now correctly check if a user has had a previous completed enrolment or open enrolment in the target Catalogue Item. If the catalogue item is flagged as "Never Allow Re-enrolment" any completed enrolment in that course will prevent re-enrolment correctly now. Any open enrolment in a catalogue item also prevents re-enrolment.

Enhancements

Title

CLS-13426 | 79727

Problem

Social Learning Challenges were not behaving correctly on non-social pages (such as 'My Learning'). The launch button did not appear on them.

Solution

The launch button now shows on Social Learning Challenges when they appear on the My Learning page.
