

# Janison Academy.

## Release Notes

FY23Q1S6

Build number: 2.1.2315.1

# Enhancements

Title

CLS-13439

## Problem

Import Users from Spreadsheet previously had an error where it would not respect re-enrolment exclusions. As part of continuing improvement this feature needed to act consistently around all re-enrolment options.

## Solution

Import Users from Spreadsheet now will not trigger re-enrolment, regardless of catalogue item settings. Import Users from Spreadsheet will still correctly trigger new enrolments. Tool-tips on Re-enrolment settings have been updated to mention this explicitly.

If it is important that users updated through the Import Users from Spreadsheet function are re-enrolled in previously completed courses then it is recommended to set up a "Daily Check" rule instead.
