

Janison Academy.

Release Notes

FY23Q2S2

Build number: 2.1.2317.1

Bug Fixes

Inactive users with marker extra role still receives email notifications when a user submits a learning asset for marking

CLS-13420 | 78041

Problem

Inactive users with marker extra role still received email notifications when a user submits a learning asset for marking

Fix

Fixed the case that the system email send function was not checking the case that the user was active or didn't have an email address set. If a user is inactive or they don't have an email address set , no email should be sent. In this case a error will be logged which will say 'The recipient of this message is not available'.
