

Janison Academy.

Release Notes

FY23Q4S8

Build number: 2.1.2348.1

Bug Fixes

User Enrolment Rule - On Creation option not picking up due dates set in the catalogue item

CLS-13514 | 90038

Problem

When a User Enrolment Rule has this On Created enabled in its settings and the due date is set to be pulled from the catalogue item, whenever a new user is created the enrolment is created however fails to pick-up the due date.

Fix

Fixed a bug where UERs set to pick up the Catalogue Item's due date were not doing so upon User creation (both bulk import and single user through the UI). UERs now correctly pull through the expiry date from the Catalogue Item when set to do so.

Error when editing/adding a Learning Event asset

CLS-13570 | 93547,94112,97574

Problem

Clients have reported an issue where attempting to edit or add a Learning Event asset results in an error message stating that resources failed to load. This error prevents the modification and changing of the asset.

Fix

Fixed a regression where adding a Learning Event or Editing a Learning Event that still had its original author would encounter a NULL value error.

Enhancements

My Learning : Grid view UI update

CLS-13576

Improvement

Small improvements to the new Grid View on the My Learning page:

- Expiry date added as a new column to Grid View.
- The dates are in a dd/mm/yyyy format.
- The date columns are sortable.
