Janison Academy.

Release Notes

FY24Q1S2

Build number: 2.1.2412.1

Bug Fixes

My Learning - page infinitely presents a loading icon and won't load data

CLS-13591| 97910,98336,98559,98723

Problem

A number of users are having an issue wherein if affected users access the page for My Learning, the page presents an infinite loading icon and would not load any data.

Fix

A regression was introduced where converting the completion date of some enrolments from UTC in very niche cases was causing an unexpected date/time format that caused the page to hang. This calculation has been corrected and superfluous date fields on the page removed. No updates to affected users' enrolments will need to be made.
