Release notes

FY24Q4S2

Build number 2.1.2442.4

Bug fixes

Unauthenticated module pages not working when previewed in CLS

Internal #: CLS-13706 | Helpdesk #:115085

Problem

A client encountered an error on footer links (while logged out) when previewing the module, even if the 'Allow Unauthenticated Access' is enabled.

Fix

An error with Menus on pages that "Allow Unauthenticated Access" was preventing anyone unauthenticated from actually seeing the page. Menus are now correctly hidden for unauthenticated users when viewing these pages and so they display properly.

Improvements

Extend timeout of Custom Reports

Internal #: CLS-13719

Change

Timeout of selected custom reports has been increased to allow us to narrow down on the inefficient calls in failing reports and inform our fixes.
