

Janison.

Janison Academy

Release notes

FY25Q4S3

Build number 2.4.2543.1

Bug fixes

Source Code and Config Disclosure

Internal #: CLS-13915 | Helpdesk #:137639, 137945

Problem

A webconfig file may have been publicly available. This file contained a Machine key.

Fix

MachineKeys for the Academy environment have been refreshed in line with internal security advice.

Improvements

B2C to allow for custom checkbox on the login page

Internal #: CLS-13959

Improvement

B2C's MFA flow now allows for a custom mandatory checkbox on the login page, similar to current functionality in CLS. It will pull the string resources as per current login page, and users cannot login without checking the box. This has been used prior to MFA for Ts&Cs and Privacy Notices.
