

**Janison.**

# **Janison Academy**

## **Release notes**

**Release 2026.03.02**

Build number: 2.4.2618.1

# Platform Improvements

## Payment Gateway - PayWay Classic API update

Internal #: CLS-14068 | Helpdesk #: 180479, 188059

### Problem

Due to a mandatory update initiated by Westpac, a new classic API certificate update is required by 28 February 2026. This certificate update also requires a code change to add an extra configuration property to support a dedicated certificate password.

### Fix

We have added the new certificate password property and can now successfully configure and accept the updated .pfx certificate format.

# Bug fixes

## Organization with long names causing error when importing SCORM Courses

Internal #: CLS-13319 | Helpdesk #: 74390

### Problem

An issue was discovered where users received an error when uploading a SCORM course for Organisations with names longer than 49 characters.

### Fix

We have increased the character limit to 80 to match the maximum allowed characters. This change allows SCORM courses to be uploaded successfully for Organisations with long names without requiring any name changes or workarounds.
