

API Release Notes

Events API Version 5

Release Notes

Please ensure to update your environments to the newest API version available to use the latest API features. Version 5 of the Events API is required for this new feature.

Events

- The Events API has been extended to return the associated Test ID or Test Package ID; (JIRA INS-7914)
 - GET /events/{eventId} call will return the available Test ID, when linked to a test.
 - GET /events/{eventId} call will return the Test Package ID when linked to a test package.
