API Release Notes

Events API Version 9

Release Notes

Please ensure to update your environments to the newest API version available to use the latest API features.

Platform

- We improved our APIs to support the new PNP Type model. The older endpoints continue to work without the new field, while newer versions require a typed PNP with validated enum values. (JIRA: INS-10636)

[Swagger](#)

Please note: Our internal tickets will be displayed as 'JIRA INS-1234', while tickets raised directly to our helpdesk will be displayed as 'HELDESK 123456'.
